Benefits

Compliant composition and distribution to meet IRS deadlines

Audit trails for history and compliance

Integration to member portals for electronic delivery

XML Transmittal requirements met

Detailed reporting

How can I ensure my 1095-B Forms are compliant and timely?

Clarity has a comprehensive solution to produce 1095-B Forms for health plans. The process supports the requirements around timeliness and reporting for compliance-driven documents. 1095-B Forms can be printed on demand and mailed or delivered electronically. Additionally, Clarity supports the XML Transmittal requirements of the IRS.

How do you protect member information?

Clarity transfers data using secure file transfer protocol (SFTP) and then encrypts all protected health information (PHI).

How it Works

- Organize. Within the secure, online application, a data driven process lets clients create 1095-B Forms. A simple, online interface archives previous forms, populates new forms and is always compliant with distribution requirements.
- **Customize.** Clients can publish member centric forms that are combined with variable data. This approach allows for static plan specific information to be combined with personalized materials such as masked social security numbers, as required by the IRS.
- **Deliver**. Integrated into the process is the development for members to receive their materials electronically via member portal or e-delivery rather than through print and fulfillment, significantly saving printing and postage costs. Reporting on all delivery types and dates is available to ensure compliance with the IRS.
