

## THE CLARITY DIFFERENCE

- Print Ready Files
- Flexible Distribution
- Cost Containment
- Real-time Redundancy
- One Simple Interface

Print with us, without us, or not at all.  
That's the Clarity difference.

### You choose the Output

Using your rules and data, The Clarity system gives you the power to create custom documents on demand. The Clarity Composer is completely output independent. Whether the document is destined for print, online, or mobile presentment, you can be confident it will be perfect on arrival.

### You control where the Output goes

The Clarity Composer is your partner for simple, seamless document creation. Once the document is created, you can choose Clarity's turnkey print production and fulfillment services, your in house printer, or an outside vendor. Or skip the printing and deliver the document electronically.

Documents wherever you want, whenever you need.
